

Claims:

1. A protein or its molecular variant that can induce an allergic reaction in persons sensitized to the protein.
- 5 2. A protein or its molecular variant as claimed in claim 1 characterized in that the DNA sequence encoding the protein or a portion of the protein is as follows:

5	DNA: acgcggggcggttaacacttggtttttgcttccaattcatggagttccctg	51

- 30 3. A protein or its molecular variant as claimed in claim 1 or 2 characterized in that the protein or its molecular variant has the following properties:
- 35 a. has a molecular weight of about 42,000 Dalton;
- b. has an isoelectric point of about 4.7;

- c. binds with IgE of patients sensitized to the protein; and
- d. contains the amino acid sequence or portions thereof or minor variations of these amino acid sequence as shown below:

4. A process for obtaining a protein or its molecular variant according to any one of Claims 1 - 3 wherein the process comprises the following steps:

30

- a) centrifuging the latex for obtaining the bottom fraction;
- b) freeze-thawing the bottom fraction for obtaining the latex B-serum; and

c) isolating and purifying the protein from the B-serum obtained in step (b).

5. A process for obtaining a protein or its molecular variant as claimed in Claim 4 wherein the isolation and purification of the protein are carried out via a series of chromatographic separations.

6. A process for obtaining a protein or its molecular variant as claimed in claim 5 wherein the chromatographic separation is ion exchange chromatography and gel filtration.

7. A peptide that is derived from the protein as claimed in any one of claims 1 - 3 or prepared according to the process as claimed in any one of claims 4 - 6 wherein the peptide has similar allergenic properties as the protein as claimed in claims 1 - 3.

8. A DNA sequence encoding the protein or a portion of the protein as claimed in claim 1 wherein the DNA sequence or minor variations of this sequence is as shown below:

11. A method for the production of a protein or its molecular variant in recombinant form as claimed in claim 9 or 10 wherein the vector is a micro-organism, a plant or an animal.
- 10 12. A method for the production of a protein or its molecular variant in recombinant form as claimed in claim 11 wherein the micro-organism is a bacterium, a virus or a yeast.
- 15 13. A method for the production of a protein or its molecular variant in recombinant form as claimed in claim 12 wherein the bacterium is *Escherichia coli*.
- 20 14. A method for the production of a protein or its molecular variant in recombinant form as claimed in claim 9 wherein the inducer is preferably isopropyl thiogalactoside (IPTG) or any other suitable inducer.
- 25 15. A recombinant protein or its molecular variant in recombinant form produced according to the methods as claimed in any one of claims 9 - 14.

16. The use of native protein or its molecular variant as claimed in any one of claims 1 - 7 in immunoassay and immunotherapy.
- 5 17. The use of recombinant protein or its molecular variant in recombinant form as claimed in any one of claims 8 -15 in immunoassay and immunotherapy.
